FULL STACK APPLICATION DEVELOPMENT (24SDCS02)

2025-26, Even Semester

Project Problem Statement Submission Form

Section - 13	**Team No - 10**	**Micro Learning Portal**

1. Abstract

Learning platforms today often focus mainly on passive content consumption, limiting student interaction and practical engagement. The Miro Learning Platform addresses this issue by providing an interactive micro-learning environment where both teaching and active participation are integrated. In this system, experts can upload tutorials and learning materials, while students can access content, submit their work, and receive feedback.

The platform incorporates a peer-review mechanism, allowing learners to evaluate each other's submissions, thereby enhancing collaboration and critical thinking. It also includes progress tracking features that help users monitor their performance and learning growth over time. The system is designed with user-friendly dashboards and structured workflows to ensure smooth navigation and accessibility.

2. Module Mapping

(Provide details of how modules are divided among team members.)

Module Name	Assigned Roll Number(s)	Signature
Student Dashboard	2420030418	
Company Dashboard	2420030418	
Match Percentage Logic & Backend	2420080044	
Frontend UI/UX	2420030635	
Database & Deployment	2420080044	

3. Module Details

- **Student Dashboard:**
  Allows students to enter and update their skills, view their internship readiness scores, receive personalized internship recommendations, and identify missing skills needed for better matches. (2420030418)
- **Company Dashboard:**
  Enables companies to post internships with required skill sets, view auto-shortlisted candidates based on match percentages, and analyse skill match breakdowns for each applicant. (242003418)
- **Match Percentage Logic and Backend API:**
  Develops the core algorithm to calculate match percentages between student skills and internship requirements, manages backend logic, and ensures seamless data exchange between frontend dashboards and the database. (2420080044)
- **Frontend UI/UX Design and Implementation:**
  Designs and implements an intuitive and responsive user interface for both student and company portals using modern frontend frameworks and styling tools to ensure excellent user experience. (2420030635)
- **Database Management and Deployment:**
  Responsible for designing the database schema, managing data storage and retrieval efficiently, and deploying the application on cloud hosting platforms to ensure reliability and scalability. (2420080044)

4. Frameworks / Platforms / Software Used

- **Frontend:** React.js / Angular / Vue.js
- **Backend:** Node.js with Express / Django / Flask
- **Database:** MongoDB / MySQL / PostgreSQL
- **Hosting:** Heroku / AWS / DigitalOcean
- **Version Control:** Git and GitHub
- **Additional Tools:** Bootstrap / Tailwind CSS for UI styling
